Muhammad Eitasam

Junior IT Professional · Automation Specialist · Web Developer

PROFESSIONAL SUMMARY

Recent IT graduate with 1+ year of professional experience in automation, backend development, and AI-powered workflows. Specialized in Zapier, n8n, and GoHighLevel (GHL) automations, REST API integrations, and Node.js backend development. Experienced in building AI agents, CRM pipelines, and multi-platform automation workflows for agency clients. Also proficient in Google Sheets advanced formulas from hands-on accounting experience.

WORK EXPERIENCE

IT Intern / Junior Developer

Easyaiz Software House — Mirpur Khas, Pakistan · 2024 – Present

- ▶ Designed and deployed multi-step Zapier automations to streamline business workflows, reducing manual tasks significantly
- ▶ Built and managed n8n automation workflows and AI agents for agency clients, including API integrations and event-driven pipelines
- ▶ Developed GoHighLevel (GHL) CRM pipelines, automations, and AI agents; built client websites within the GHL platform
- ▶ Built and consumed REST APIs for third-party service integrations including data sync, webhooks, and event-driven triggers
- ▶ Developed web application backends using Node.js and Express.js including routing, APIs, and form handling
- ▶ Built client-facing website features with HTML, CSS, and JavaScript for improved user experience
- ▶ Documented automation workflows and API integration processes for team knowledge transfer

Accountant / Data Manager

Retail Mart — Mirpur Khas, Pakistan · ~6–7 Months

- ▶ Managed daily sales, inventory, and financial records using Google Sheets
- ▶ Built advanced Google Sheets formulas (VLOOKUP, SUMIF, IF, INDEX/MATCH) for automated reporting and tracking
- ▶ Tracked stock levels, purchase orders, and expenses with structured spreadsheet dashboards
- ▶ Ensured accurate daily data entry and reconciliation of accounts

KEY PROJECTS

◆ Business Automation Suite (Zapier)

- ▶ Built Zapier automation connecting CRM, email, and spreadsheets — eliminated 10+ hours of manual data entry per week
- ▶ Integrated webhook triggers for real-time event processing between multiple platforms

◆ n8n AI Agent Workflows (Agency Projects)

- ▶ Designed and deployed n8n-based AI agent workflows for agency clients, automating lead handling, follow-ups, and data routing
- ▶ Integrated external APIs within n8n pipelines to create end-to-end automated business processes
- ▶ Built multi-step n8n workflows connecting CRMs, email services, webhooks, and third-party tools

◆ GoHighLevel (GHL) CRM & Automation

- ▶ Set up GHL CRM pipelines, automated follow-up sequences, and AI-powered agents for client businesses
- ▶ Built client-facing websites and landing pages directly within the GHL platform
- ▶ Configured campaign automations and lead management workflows to improve client conversion rates

TOOLS

- ▶ Git / GitHub
- ▶ VS Code
- ▶ Postman
- ▶ n8n Platform
- ▶ Zapier Platform

◆ API Integration Dashboard

- ▶ Developed a Node.js backend to aggregate data from multiple REST APIs into a single unified dashboard
- ▶ Implemented API authentication flows (API keys, OAuth) for secure third-party connections

◆ Company Website Backend

- ▶ Built backend routes and form handling using Node.js/Express for a client-facing website
- ▶ Integrated email notification API to automate client follow-ups
